Subject: Recycling at City Walk Residences

Dear Resident,

We are pleased to introduce house hold recycling facilities at City Walk Residences. Through your cooperation we can reduce waste to landfill, ensuring responsible disposal of waste materials. Please find further information on the City Walk Residences recycling programme below:

How to recycle at City Walk?

Please pick up your City Walk recycling bag from your building concierge. These bags are for the collection of mixed recyclables in your home.

The recycling bags provided are reusable, washable and designed to be easily stored underneath your kitchen sink or in the utility room. Once your recycling bag is full, you may empty it at the recycling bin located next to the waste chute on your floor.

The recyclables will then be moved by the housekeeping team to the recycling cages in the waste room for the building, from where it will be picked up by the appointed service provider and removed to their recycling facility. From here, further segregation of the waste streams will take place prior to processing.

For your ease of reference, the type of recyclables accepted are depicted on the bag.

Should you have any queries, please do not hesitate to contact us on 800 2662 or email ServiceRequest@mcm.ae.

Thank you
